

History:

The starting point in 2009/2010: to ensure trouble-free operation of the sanitary and HVAC systems in residential building complex

Customer: Three residential complexes with different owners but identical buildings

Project:

- chemical-free water treatment in tap system
- to protect the plumbing systems in buildings
- comparison two supposedly equivalent systems
Pipejet and a competitor's product

Long term:

After the comparison, end of 2014 it was clear to the customer. Pipejet performed significantly better. Third customer installed Pipejet in 2015 in "his" building too.

Result:

3 satisfied customers to this day...

We are delighted that larger customers - such as housing associations or cities are taking the time to compare systems.
